ASHISH KHOPDE

MERN STACK DEVELOPER | FULL STACK DEVELOPER

India | +91-7089542024 | ashishkhopde7089@gmail.com | LinkedIn: ashishkhopde | GitHub: ashishkhopde

PROFESSIONAL SUMMARY

MERN Stack Developer with 9 months of professional experience building full-stack web applications using React.js, Node.js, Express.js, MongoDB, and TypeScript. Experienced in developing CRM systems, marketplace platforms, property listing and booking applications, stock management platforms, and lead management solutions. Hands-on experience with PostgreSQL, Redis, WebSockets, Docker, JWT authentication, role-based access control, payment gateway integration, Meta Lead Ads API, and RTO API integration. Strong experience in RESTful API development, third-party integrations, database management, and business workflow implementation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Responsive Web Design
Backend: Node.js, Express.js, RESTful APIs, JWT, Authentication, Authorization, RBAC
Databases: MongoDB, PostgreSQL
Real-Time & Performance: Redis, WebSockets, Caching
DevOps & Tools: Docker, Git, GitHub, Postman, npm
Integrations: Meta Developer API, Meta Lead Ads API, RTO/Vehicle Verification API, Payment Gateways, REST APIs
Development: CRUD, Database Design, API Development, Validation, Error Handling, API Security

PROFESSIONAL EXPERIENCE

MERN Stack Developer | **Quest Digiflex Private Limited** — India
March 2026 – September 2026

- Developed and maintained full-stack web applications using React.js, Node.js, Express.js, MongoDB, PostgreSQL, and TypeScript.
- Designed and integrated RESTful APIs for CRM, marketplace, property management, lead management, and booking workflows.
- Built reusable and responsive React.js components and integrated frontend applications with backend services.
- Implemented JWT authentication, authorization, role-based access control, and permission-based workflows.
- Integrated third-party services including Meta Lead Ads API, RTO vehicle verification API, and payment gateways.
- Used MongoDB and PostgreSQL for database design, queries, and application data management.
- Worked with Redis for caching and WebSockets for real-time application functionality.
- Used Docker for containerized development and application environments; tested APIs using Postman.

December 2025 – February 2026
MERN Stack Intern | Quest Digiflex Private Limited — India

PROFESSIONAL PROJECTS

Tractors24 — Tractor Marketplace & Services Platform

Technologies: React.js, Node.js, Express.js, MongoDB, JavaScript, REST APIs, RTO API

- Developed tractor listing and management workflows for a platform used to list and sell tractors and related paid services.
- Developed RESTful APIs and CRUD operations for tractor and service-related data.
- Integrated an RTO/vehicle verification API to verify tractor details using the vehicle registration number.
- Implemented vehicle verification workflows during tractor listing and management.
- Built React.js interfaces and integrated them with backend APIs.
- Implemented authentication, authorization, validation, and permission-based functionality.

LeadX — CRM & Meta Lead Management Platform

Technologies: React.js, Node.js, Express.js, PostgreSQL, JavaScript, Meta Developer API, Meta Lead Ads API

- Developed CRM modules for lead management, tracking, status updates, and follow-up workflows.
- Integrated Meta Developer Account and Meta Lead Ads API to fetch leads generated from Meta advertisements.
- Developed backend services to process and store incoming Meta leads in the CRM.
- Developed student inquiry and student management functionality.
- Implemented authentication, authorization, and role-based access control.

Assetzo — Property Listing & Booking Platform

Technologies: React.js, Node.js, Express.js, PostgreSQL, JavaScript, Redis, Docker, Payment Gateway

- Developed property listing functionality for Rent, Sale, and Lease.
- Implemented property search, filtering, property details, and listing management workflows.
- Developed Homestay functionality for short-term property bookings based on the number of days.
- Developed APIs for property, user, and booking management and integrated payment gateway workflows.
- Implemented authentication, authorization, role-based access control, and Redis caching.
- Used MongoDB, PostgreSQL, and Docker for application data management and development environments.

Hospital Management System — CRM

Technologies: React.js, Node.js, Express.js, PostgreSQL, MongoDB, TypeScript, REST APIs

- Developed a SaaS-based Hospital Management System (HMS) for healthcare organizations, supporting organization-specific workflows and management operations.
- Developed RESTful APIs and CRUD functionality using Node.js and Express.js.
- Implemented authentication, authorization, role-based access control, validation, and permission-based functionality.
- Built reusable React.js components and integrated frontend modules with backend APIs.

FREELANCE PROJECT

AngelSmartAlgo — Stock & Portfolio Management Platform

Technologies: React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication

- Developed a stock and portfolio management platform where administrators manage client holdings and transactions.
- Built admin functionality to manually add, update, and track stocks held by clients.
- Implemented client workflows for stock purchase requests, stock sell requests, and withdrawal requests.
- Developed admin workflows to review and manage purchase, sell, and withdrawal requests.
- Implemented client balance and transaction management and JWT-based authentication and authorization.
- Developed RESTful APIs and managed MongoDB data models for stocks, portfolios, transactions, and withdrawals.

EDUCATION

- **B.Tech in Information Technology**, Laxmi Narayan College of Technology (2022-26)
- **Class XII (CBSE)**, Vidya Vijay Bal Mandir (2021-22)

ADDITIONAL INFORMATION

- **Total IT Experience: 9 Months (6 Months Professional + 3 Months Internship)**
- Target Roles: MERN Stack Developer, Junior Full Stack Developer, React.js Developer, Node.js Developer
- Primary Stack: MongoDB, Express.js, React.js, Node.js
- Additional Technologies: TypeScript, PostgreSQL, Redis, WebSockets, Docker
